WORK EXPERIENCE

Maximus LTD – London, United Kingdom

June 2025 – Till date

Creative Director | Product Designer | UI UX Designer

- Led end-to-end UI UX design of the platform's core experiences, including full onboarding and dashboards for both customers and service providers, ensuring seamless user journeys.
- Designed and built conversational AI interfaces, crafting user flows and responses.
- Crafted intricate operational workflows within the product, optimizing multi-step processes for efficiency and clarity.
- Produced wireframes, high-fidelity mockups, and interactive UI components for mobile-first applications. Also designed and integrated Lottie animations to enhance micro-interactions and elevate the overall user experience.
- Built and maintained a scalable Figma component library and comprehensive UI kit, integrating the platform's branding to ensure consistent, reusable, and visually cohesive designs across all products.
- Worked closely with cross-functional teams to ensure user-centered feature development, smooth handoffs, and alignment between design, product, and engineering.

Milo - USA

December 2024 - March 2025

UI / UX Designer | Creative Director

- Led the UI/UX design and creative direction, collaborating with owners, project managers, developers, and junior designers to ensure seamless product delivery.
- Applied problem-solving techniques to identify pain points in the user flow, resulting in a 35% optimization of the journey and a 20% reduction in iteration time through efficient prototyping and user testing.
- A 60% increase in brand recognition was achieved through a redesigned logo and a high-conversion marketing landing page.

Raen AI - Dubai, UAE

February 2024 - May 2024

Creative lead | Website Designer

- Developed a cohesive brand identity, including a distinctive logo and extensive brand book, increasing brand recognition by 30%.
- Designed essential collateral, including business cards, stickers, booth designs, and letterheads, establishing a consistent and professional brand image by 80%.
- Designed a user-centric website showcasing Raen AI's technology, with interactive product features that led to a 50% increase in web traffic and a 40% boost in user engagement.
- Utilized UX research and user testing to refine website functionality and improve user flow..

Master Systems - Dubai, UAE

May 2023 – July 2023

Website Designer

- Improved user experience by 50% by designing intuitive UI elements with interactive animations.
- Enhanced web traffic through visually engaging layouts, high-quality imagery, and interactive features such as maps, resulting in a 20% increase in contact form submissions.
- Increased international leads by expanding the website's reach through targeted content and personalized outreach.
- Utilized responsive design principles and conducted user testing to refine and enhance the website's performance.
